

Design by software (2D/3D)

A team of experts

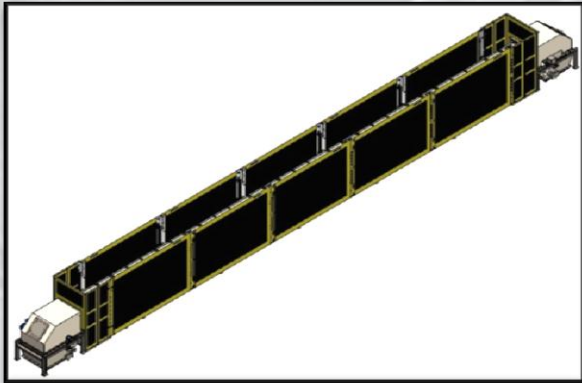

Design project
WE WILL MAKE IT A SUCCESS!

THE **LEADER** IN METAL PROCESSING

AND YOUR PARTNER IN ENSURING YOUR EQUIPMENT'S SAFETY

www.prometalplus.com

Specialists for many years

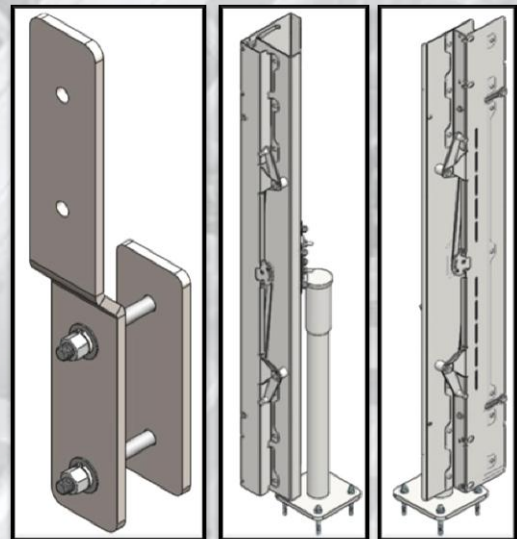

Quality finished products

PRO-MÉTAL PLUS employs imaginative designers who can meet your needs. Their experience reflects the quality of their finished products. We currently employ ten skilled drafters and designers, allowing us to prepare improved development and design projects.

3D design

By using Autodesk Inventor in 3D view, our drafters can illustrate a realistic version of the final product for our customers. We make this invaluable evaluation tool available to you so that you can see the result you will obtain, even before the fabricating process begins. Trust us with your design project: we'll make it a success!
